Cascades Humane Society

## Impact Report 2022

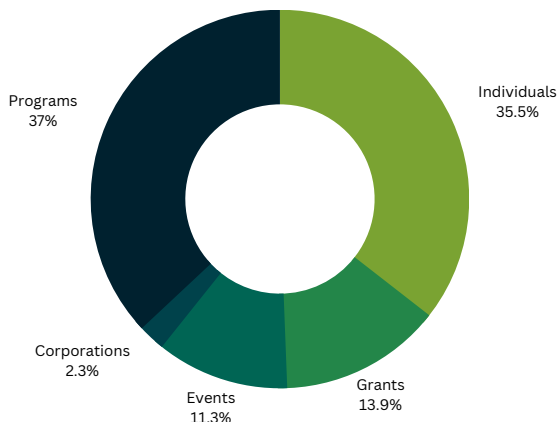

**98.8% Live Release Rate!**

In Calendar Year 2022

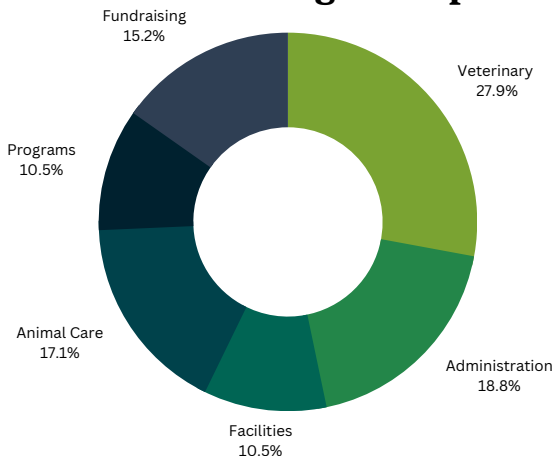

## Where Funding Came From

*We do not receive any funding from the government and are not affiliated with other humane societies or national pet organizations.*

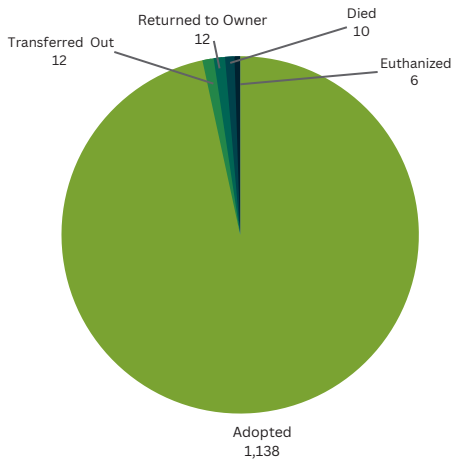

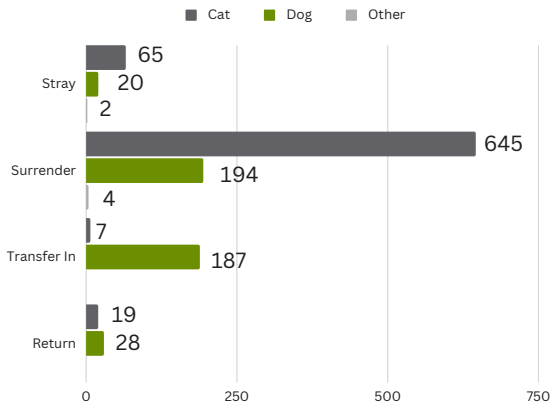

## Where Funding Was Spent

Every life is meaningful to us, even those with special needs. We ensure each pet that comes to us is spayed or neutered, disease tested, vaccinated, and microchipped. In addition to this routine (for us) care we give every animal, we provide medical evaluations and treatments to those animals that need it. We do not shy away from any problem, whether it is medical or behavioral. We are grateful for the support of our community, which allows us to afford these particular pets!

## Community Impact

## From the Executive Director

We are so excited that our Live Release Rate (or Save Rate) for 2022 is 98.8%! There are a couple ways to calculate this rate. We used ASPCA's, which takes the number of live animals that left the building divided by the number of pets we brought in.

In my eight years at CHS we have always had great save rates, in the upper 90th percentiles. Being at nearly 99% is quite the accomplishment especially considering the increase in special needs medical cases that we have fought for this year.

We couldn't have done this without several key players. One, our medical staff, including our wonderful Medical Director. Second, all our staff working tirelessly to ensure that optimal care is given to each animal. Third, our amazing volunteers who help us take care of our facility and animals each day. Finally, and most importantly, YOU. Your support means we can go the extra mile - whether that is additional surgeries, diagnostic testing like x rays and ultrasounds, bloodwork, or even just more time to heal and find a forever home.

Thank you for coming on this journey with us and saving lives!
